

Sea Technology Index

Volume 21, 1980

This is a three-part, instant-reference index of technical material and news appearing in Sea Technology magazine, Volume 21, 1980. Part One, Monthly Contents; Part Two, Authors; Part Three, Subject Index. Numbers following title, author or subject are month and page number.

PART ONE MONTHLY CONTENTS

January 1980

Sound Management and Coordination—Editorial	7
Soundings	9
U.S. Ocean Policy 1980: The End of the Beginning or the Beginning of the End?	11
Law of the Sea Treaty Can and Must Be Concluded	12
Ocean Mining: Early Death or Bright Future	12
Reassessing the Coastal Zone Management Act 1980s—Decade of Ocean Development	13
Diving Education Will Emphasize Specialties	14
Trends in Oceanographic Education	15
Ocean Energy Systems Progress	17
Better Viewing Under the Ocean Bottom	19
Gloria Explorer and Future Scientific Deep Ocean Drilling	19
Navy Strengthens ASW Directions	21
Ocean Pollution Planning Receives New Focus	22
Export Markets: The Future for Alaskan Fish Products	23
Making the Ocean Transparent: Profile Klein Associates	32
A Wide-Angle Correcting Lens For Underwater TV	37
SEG 79 Shows Exploration Growth	39
Maneuvering Systems Aid Torpedo Recovery	41

THE BEST OF BOTH WORLDS • PERFORMANCE • PRICE •

The INnerspace Model 431
Acoustic Release

- Reasonable price.
- Many codes (80 codes max.).
- Secure coding.
- Small size (28" long — 5 1/2" Dia.).
- Light weight (6 lbs. in water).
- Safe, no exploding devices.
- Inexpensive, replaceable batteries.
- Optional rope canister.
- Optional load multiplier.

The Model 431 is designed specifically for shallow water applications (to 1000 ft.) for the recovery of in situ instruments — transponders, current meters, lapsed time cameras and is ideal for relocating underwater sites — well heads, valves, cables, submersibles, etc.

INNERSPACE TECHNOLOGY, INC.

IMMEDIATE Ocean Engineering OPPORTUNITIES

In the Ocean
Engineering & Construction
Project Office of the
**NAVAL FACILITIES ENGINEERING
COMMAND**
for

- General Ocean Systems Engineer with emphasis on acoustic, electronic, and electro-mechanical design
 - General Ocean Engineering, analysis or design with emphasis on moorings, hydrodynamics, structures and project engineering.
 - Construction Engineer, including structural, mooring and cable installation
- Starting pay \$22,486 to \$32,048 plus, government benefits, and growth potential.

For more information call Irene Clouden at (202)433-3034, or send your resume to:

**Auto Track
Model 412**

- 412 AUTO TRACK easily interfaces to any survey echo sounder.
- Raytheon • Bludworth • Atlas • Edo • Ross • and others •
- Customer owned echo sounder may be used.
- Optional internal echo sounding transceiver (200 kHz).
- Compatible with all boat positioning and data acquisition systems.
- System integration services available.
- Immediate delivery.
- Available for purchase or lease.

PROVEN FIELD PERFORMANCE
Corps of Engrs. • Dredging companies •
Survey companies • Consulting engrs.
